Q1. Plot $x = y^2 + 4z^2$

Q2. Find equation of the plane that passes through points A(1, 2, 3), B(0, 1, 2) and C(1, -1, 1).

Q3. Find distance between two parallel planes given by $10x + 2y - 2z = 5$ and $15x + 3y - 3z = 3$
