**STAT319: PROBABILITY & STATISTICS FOR ENGINEERS & SCIENTISTS
Course Syllabus, Fall 2007 (Term 071)**

Text : Probability & Statistics for Engineers and Scientists by Walpole et al. (2002) 7th ed.

Software Package: The Student Edition of *STATISTICA* with a Lab Manual.

Course Objectives: Introducing the basic concepts of probability and statistics to engineering students. Emphasis will be given on the understanding of the nature of randomness of real world phenomena, the formulation of statistical methods by using intuitive arguments and thereby making meaningful decisions.

Assessment: Assessment for this course will be based on at 8 tests, a major exam, a final exam and lab works, as in the following:

Activity	Weight
<i>Home Works, class work and Class Tests: There will be quiz at the end of each chapter</i>	20%
<i>Lab Works</i>	15%
<i>Major Exam (Chapters 1 to 6) Sunday 18/11/1007 at 5.30pm-8.00pm</i>	30%
<i>Final Exam (Chapters 8-11)</i>	35%

Students are required to carry a Scientific calculator with **stat functions** to every lecture, lab and in the exam with them. Usually once a chapter is finished, you expect a class test.
