Text : Probability & Statistics for Engineers and Scientists by Walpole et al. (2007) 8th ed.

Software Package: The Student Edition of **STATISTICA** with a Lab Manual.

Course Objectives: Introduce the basic concepts of probability and statistics to engineering students. Emphasis will be given on the understanding of the nature of randomness of real world phenomena, the formulation of statistical methods by using intuitive arguments and thereby making meaningful decisions.

Assessment:

Activity	Weight
Home Work, Quizzes, Projects, Class Works, Attendance	20%
Lab Work	15%
Major Exam (Chapters 1 to 5) – Monday, 17 th November, 2009, 7-9pm, Building 10	25%
Final Exam (Comprehensive) TBA	40%

Students are required to carry a Scientific calculator with **stat functions** to every lecture, lab and in the exam with them. Usually once a chapter is finished, you expect a class test.
