

**KING FAHD UNIVERSITY OF PETROLEUM & MINERALS**  
**DEPARTMENT OF MATHEMATICS & STATISTICS**  
**DHAHRAN, SAUDI ARABIA**

**STAT211: BUSINESS STATISTICS I (122)**

**Coordinator:** Musawar Amin Malik

**Office:** Building 5-room 306

**Phone:** 2396

**E-mail:** [mmalik@kfupm.edu.sa](mailto:mmalik@kfupm.edu.sa)

**Office Hours:** SMW: 8:00 am - 9:00 am, M: 12:00 pm - 1:00 pm. T: 10:00 am – 12:00 pm or by appointment

**Textbook and Package:**

1. Basic Business Statistics: Concepts and Applications, 11<sup>th</sup> edition, by Berenson, M.L., Levine, D.M., and Krehbiel, T.C., Pearson-Prentice Hall (2009).
2. MINITAB (<http://www.minitab.com/products/minitab/student/>)
3. **Scientific calculator with statistical functions**

**Course Objectives:**

Introduce basic concepts of probability and statistics to business students. Emphasize the understanding of the nature of randomness of real world problems, the formulation of statistical methods using intuitive arguments and thereby make meaningful decisions.

**Assessment**

Assessment for this course will be based on quizzes, attendance, homework, lab, two major exams and a comprehensive final exam, as in the following:

Activity	Weight
Quizzes <sup>1</sup> , Attendance, Homework and Lab work	(8%+3%+4%+5%)
Exam 1 (Chapters 1, 2, 3 & 4) <b>Tuesday February 26, 2013, 7pm, in Building 59</b>	20%
Exam 2 (Chapters 5, 6 & 7) <b>Tuesday April 23, 2013, 7pm, in Building 59</b>	20%
Final Exam (Comprehensive) <b>Thursday May 16, 2013, 7 pm</b>	40%

**\*You need to achieve at least 50% in order to pass the course**

**Academic Integrity:** All KFUPM policies regarding **ethics** and **academic honesty** apply to this course.

**Important Notes:**

- ✓ Excessive unexcused absences will result in a grade of **DN** in accordance with University rules.
- ✓ **Attendance** on time is **very** important.
- ✓ **A formula sheet** and **statistical tables** will be provided for you in every exam.

**Home Work:**

- Handout problems will be posted on the WebCT or in the instructor home page towards the end of each chapter.
- The **Homework** should be submitted in the first Saturday after completing the chapter ***and no need for an announcement in advance.***
- No late homework will be accepted.

<sup>1</sup> Once a chapter is completed, you should expect a class quiz.

### Syllabus (Tentative)

<i>Week</i>	<i>Sections</i>	<i>Topics</i>	<i>Notes</i>
<b>Week 1</b> 26/1 – 30/1	1.1-1.6	What is Business Statistics, tools for data collection populations, samples, data Types and measurement levels, type of variables. Business statistics and computer	29 January  Last day for late registration; Last day for adding courses.
<b>Week 2</b> 2/2 – 6/2	2.1-2.5	Tables, charts for categorical data. Organizing numerical data. Tables, charts for numerical data. Cross tabulations. Scatter plots and time series plots.	6 February  Last day for dropping course(s) without permanent record
<b>Week 3</b> 9/2 –13/2	3.1-3.4	Measures of location and measures of variation. Coefficient of variation, empirical rule, Tchebysheff's inequality and standardized data values,	
<b>Week 4</b> 16/2 – 20/2	3.5 4.1	Quartiles and the Box plot Basic probability concepts	
<b>Week 5</b> 23/2 – 27/2	4.2-4.3	Rules of probability, conditional probability, Bayes theorem	
<b>Week 6</b> 2/3 – 6/3	5.1-5.3	Probability distribution for discrete random variable, the Binomial distribution	6 March  Last day for dropping course(s) with grade of "W" thru web
<b><u>February 26 - 1-st Major Exam</u> (chapters 1, 2, 3 &amp; 4)</b>			
<b>Week 7</b> 9/3 – 13/3	5.4.5.5	Other discrete distributions (Poisson & Hypergeometric)	
<b>Week 8</b> 16/3 – 20/3	6.1- 6.3	Continuous random variables, the normal distribution	20 March  Last day of classes before midterm vacation
<b><u>Midterm Vacation</u> March 23-27, 2013</b>			
<b>Week 9</b> 30/3 – <b>3/4</b>	6.4-6.7	Other continuous distributions (Exponential & Uniform) The normal approximation to the binomial	
<b>Week 10</b> 6/4 – 10/4	7.1-7.2	Sampling methods and sampling error	10 April  Last day for withdrawal from <b>all courses</b> with grade of "W" thru the Univ. Registrar
<b>Week 11</b> 13/4 – 17/4	7.3-7.5	Sampling distributions of the mean and Sampling distributions of the proportion	13 April  Early Registration for summer (123)
<b>Week 12</b> 20/4 – 24/4	8.1-8.3	Point and confidence interval estimation of the mean and proportion	
<b><u>April 23 - 2-nd Major Exam</u> (chapters 5, 6 &amp; 7)</b>			
<b>Week 13</b> 27/4 – <b>1/5</b>	8.4	Sample size determination for estimating the population mean and proportion	
<b>Week 14</b> 4/5 – 8/5	Parts of 10.1-10.2	Estimation of the difference between two population means	8 May  Last day for withdrawal from <b>all courses</b> with grade of "WP/WF" thru the Univ. Registrar
<b>15</b> 11/5 – 15/5	Part of 10.3	Estimation of the difference between two population proportions Review	15 May  Last day of classes
<b><u>Comprehensive Final Exam , May 16, 2013</u></b>			

**Learning Objectives:** By completing this course, students should be able to

- **Distinguish** between a *sample* and a *population*
- **Distinguish** between a *statistic* and a *parameter*
- **Design** a business *data collection effort* by using the most appropriate data sampling strategy
- **Classify** business data into the most appropriate *type and measurement levels*
- **Distinguish** between *continuous* and *discrete* data
  
- **Calculate** *summary descriptive statistics* manually and by MINITAB
- **Interpret** the correct *meaning of summary statistics* for particular real-life business problems
- **Graph** a *correct graphical display* for the correct type of data manually by MINITAB
- **Interpret** the *correct meaning of graphical display* for a particular real-life business problems
- **Choose** the *correct graphical display* for a particular business decision
- **Choose** the *correct summary statistics* for a particular business application
  
- **Assess** the correct probability for a particular business application manually and by MINITAB
- **Calculate** probability for different types of regular business events (marginal, conditional, and joint events) and for updated posterior business events
- **Calculate** expected values of future business events
- **Recognize and use** the correct probability distribution model for a particular business application manually and by MINITAB
- **Distinguish** between *continuous* and *discrete* probability distribution model
- **Distinguish** between *distribution for sample data, distribution for population data, and distribution for sample statistics*
- **Understand** the role of *central limit theorem* in the distribution of sample statistics
  
- **Evaluate** the *correctness and error levels* of a procedure for estimating a population parameter
- **Design** a business data collection effort by finding the *minimum necessary sample sizes* manually and by MINITAB
- **Estimate** *parameters* of a business population of interest manually and by MINITAB
- **Choose** the most *appropriate statistical procedure* for a particular type and measurement level of business data
