

King Fahd University of Petroleum and Minerals
Department of Mathematics and Statistics

STAT319: Probability and Statistics for Engineers and Scientists
Term 143

Instructor: Muhammad Riaz
Phone: 013-860-7622

Office: 5-332
E-mail: riazm@kfupm.edu.sa

Office Hours : UMT. 11:30 am – 12:30 pm, or by appointment

Course Objectives: Introduce the basic concepts of probability and statistics to engineering students. Emphasis will be given on the understanding of the nature of randomness of real world phenomena; the formulation of statistical methods by using intuitive arguments, solving them and thereby making meaningful decisions.

Learning Outcomes: By completing this course, students should acquire/learn

- A thorough understanding of descriptive statistics, both graphical and numerical
- A working knowledge of sample spaces, events, and operations on events
- Elementary probability concepts
- A good understanding of random variables and their means and variances
- Basic discrete and continuous random variables
- The concept of a sampling distribution, and the central limit theorem
- Point and interval estimation of means and proportions
- Basic concepts of hypothesis testing including the hypothesis testing setup, procedure, p-values
- Correlation
- Simple linear regression, including estimation and testing of model parameters
- Basic Concepts of multiple linear regression

Text: Applied Statistics and Probability for Engineers by D. Montgomery and G. Runger, 5th Edition, Wiley, 2011.

Software Package: The Student Edition of *STATISTICA* with a Lab Manual. A Lab syllabus is available with your lab instructor.

Assessment*

Activity	Weight
Class work	10%
Lab Work (see Lab syllabus)	20%
First Major Exam (Chapters 2-4) 4 th week	15%
Second Major Exam (Chapters 7-10 and Descriptive Statistics from Lab) 7 th week	25%
Final Exam (Comprehensive)	30%

Grade Assignment

Score	87 – 100	80 – 86	75 – 79	70 – 74	65 – 69	60 – 64	55 – 59	50 – 54
Grade	A+	A	B+	B	C+	C	D+	D

Academic Integrity: All KFUPM policies regarding **ethics** and **academic honesty** apply to this course.

Important Notes:

- ✓ Please bring your book to every class, as well as a calculator with statistical functions.
- ✓ Excessive unexcused absences will result in a grade of **DN** in accordance with University rules.
- ✓ **Attendance** on time is **very** important.

Home Work:

- ✓ To successfully learn statistics, students need to solve problems and analyze data. The selected assigned problems are specifically designed to help you understand the material.
- ✓ Homework is due in class on the first Sunday after completing a chapter.
- ✓ No late homework will be accepted.

Schedule

WEEK	Topics	Reminders
Week 1	Ch 2: Probability 2.1 Sample Space and Events 2.2 Axioms of Probability 2.3 Addition Rule 2.4 Conditional Probability 2.5 Multiplication Rule 2.6 Independence 2.7 Bayes' Theorem	
Week 2	Ch 3: Discrete Probability Distributions 3.1 Discrete Random variables 3.2 Probability Mass Functions 3.3 Cumulative Distribution Functions 3.4 Mean and Variance 3.5 Discrete Uniform Distribution 3.6 Binomial Distribution 3.7 Geometric Distribution	
Week 3	3.8 Hypergeometric Distribution 3.9 Poisson Distribution Ch 4: Continuous Probability Distributions 4.1 Continuous Random Variables 4.2 Probability Density Functions 4.3 Cumulative Distribution Functions 4.4 Mean and Variance	
Week 4	4.5 Continuous Uniform Distribution 4.6 The Normal Distribution 4.7 Normal Approximation to the Binomial and Poisson Distribution 4.8 Exponential Distribution Ch 7: Sampling Distributions 7.1 Point Estimation 7.2 Sampling Distributions and the Central Limit Theorem	MAJOR 1
	Ch 8: Statistical Intervals for a Single Sample 8.1 Confidence Interval for the Mean of a Normal Distribution with Known Variance 8.2 Confidence Interval for the Mean of a Normal Distribution with Unknown Variance 8.4 Large Sample Confidence Interval for a Population Proportion Ch 10: Statistical Inference for Two Samples 10-1.3 Intervals on the Difference in Means of Two Normal Distributions with Known Variances 10-2.3 Intervals on the Difference in Means of Two Normal Distributions with Unknown Variance	

Week 6	10-6.3 Large Sample Intervals on the Difference in Population Proportions Ch 9: Tests of Hypotheses for a Single Sample 9.1 Hypothesis Testing 9.2.1 Tests on the Mean of a Normal Distribution with Known Variance 9.3.1 Tests on the Mean of a Normal Distribution with Unknown Variance 9.5.1 Tests on a Population Proportion	
Week 7	Ch 10: Statistical Inference for Two Samples Continued 10-1.1 Tests on the Difference in Means of Two Normal Distributions with Known variances 10-2.1 Tests on the Difference in Means of Two Normal Distributions with Unknown Variances 10.4 Paired t-test 10-6.1 Large Sample Tests on the Difference in Population Proportions Ch 11: Simple Linear Regression and Correlation 11.2 Simple Linear Regression 11.4 Hypothesis Tests in Simple Linear Regression	MAJOR 2
Week 8	11.5 Confidence Intervals 11.6 Prediction of New Observations 11.8 Correlation	

Final Exam: 12:30 PM

August 13, 2015

Thursday
