Title : Calculus III

Credit : 3-0-3

Textbook : J. Stewart, Calculus (Early Transcendental) 8th edition, Brooks/Cole.

Description : Polar coordinates, polar curves, area in polar coordinates. Vectors, lines, planes, and surfaces. Cylindrical and spherical coordinates. Functions of two and three variables, limits, and continuity. Partial derivatives, directional derivatives. Extrema of functions of two variables. - Graph essential surfaces, compute limits and continuity, partial derivatives, directional derivatives, and the gradient vector;
- Explain the concept of differentiability, tangent planes, and chain rule;
- Find and classify extreme values of functions of two variables, including Lagrange multipliers for constrained optimization problems;
- Compute multiple integrals with rectangular, polar, cylindrical, and spherical coordinates and identify some applications of the double and triple integrals.

Grading Policy:

Exam I Common Exam (MCQ)	Date: Thursday, June 27, 2019	Place: BLG: 54	25% (100 Points)
	Time: 7:00 - 9:00 PM	Material: 10.1 – 12.4	
Exam II Common Exam (MCQ)	Date: Thursday, July 11, 2019	Place: BLG: 54	25% (100 Points)
	Time: 7:00 - 9:00 PM	Material: 12.5 – 14.6	
Final Exam Common Exam Comprehensive (MCQ)	Date: Wednesday, July 31, 2019	Place: TBA	35% (140 Points)
	Time: 12:30 - 3:30 PM	Material: Comprehensive	
Class Work	Online Homework: Online homework is provided through BlackBoard		5% (20 Points)
	Class Activities: It is based on quizzes, class tests, attendance, or other class activities determined by the instructor. Any quiz or test under class activity should be of written type and not of multiple-choice type. The average x (out of 20) of class activities of the sections taught by the same instructor should be in the interval $[28, 30]$.		10% (40 Points)

The Course Passing Grade: A student must score at least **50% (200 Points)** to pass the course.

Upgrade Policy: The upgrade policy is applied when 4 points out of 400 are needed to get the next higher grade. For instance, the passing grade (D) starts at 200/400. If a student gets 198/400 or 199/400, then his grade will be automatically upgrade to D. However, if a student gets 197/400 or 196/400, his grade will be upgraded to D only if his final exam score is greater than or equal 200/400 (70/140).

Exams:

Exam Questions: The questions of the exams are based on the examples, homework problems, and exercises in the textbook.

Cheating in Exams: Cheating or any attempt of cheating by use of illegal activities, techniques and forms of fraud will result in a grade of **F** in the course along with reporting the incident to the higher university administration. Cheating in exams includes (but is not limited to)

- Looking at the papers of other students
- Talking to other students
- Using mobiles or any other electronic devices

Missing an Exam:

Exam I or II: No make-up exam will be given under any circumstances. In case a student misses Exam I or Exam II for a legitimate reason (such as medical emergencies), his grade for this exam will be determined based on the existing formula which depends of his performance in the non-missed exam and in the final exam.

Final Exam: If a student misses the final exam for a legitimate reason (such as medical emergencies), he will be given a make-up final exam.

Attendance: Students are expected to attend all lecture classes.

- If a student misses a class, he is responsible for any announcement made in that class.
- A DN grade will be awarded to any student who accumulates
 - 07 unexcused absences.
 - 12 excused and unexcused absences.

(Note: the general rule for DN:

20% unexcused absences of the number of classes, and

33% excused and unexcused absences of the number of classes.)

The Usage of Mobiles in Class: Students are not allowed to use mobiles for any purpose during class time. Students who want to use electronic devices to take notes must take permission from their instructor. Violations of these rules will result in a penalty decided by your instructor.

Academic Integrity: All KFUPM policies regarding ethics apply to this course. See the Undergraduate Bulletin.

❖ **Tips on how to enhance your problem-solving abilities** (by compliments of **Dr. Al-Rasasi, D**)

- ✓ Do all homework assignments on time.
- ✓ Practice (but not memorize) more problems than those in the above list.
- ✓ Solve some of review problems available in the end of each chapter.
- ✓ Try to solve a problem on your own before reading the solution or asking for help.
- ✓ If you find it difficult to handle a certain type of problems, you should try more problems of that type.
- ✓ Review the last lecture before coming to class.
- ✓ Practicing homework problems and reviewing the class lectures will make exam problems easier to tackle.
- ✓ Visit your instructor in his office hours. Always bring partial solution of the questions that you want to discuss with your instructor.
